In compliance with the Commission's Decision (D.) 01-12-009 issued December 11, 2001 in the Underground Electric and Communication Facilities Rulemaking Proceeding R.00-01-005, the California Public Utilities Commission's Energy Division posts and serves electronically this notice of a public workshop it will sponsor to facilitate input on the design of a standardized data reporting mechanism. The workshop will be hosted by SDG&E as shown above and allow participants to discuss and make recommendations on elements to be incorporated in the data collection and reporting system. The goal of the data tracking and standardized reporting is to allow the utilities, the Commission, and interested parties, to track the safety, service reliability, and lifetime cost for both overhead and underground projects and

make valid and reliable comparisons between systems.

A data tabulation template drafted by the respondent electric utilities is attached to this notice. The template will be the basis of discussion at the workshop.

Within ten days after the workshop, we invite parties to submit and serve a position statement, discussing why their proposed data collection and reporting system are important to future public policy on undergrounding.
